

ABOUT ME

Creative and adaptable individual skilled in machine learning and data analysis. Proven ability to drive impactful projects, such as crop prediction AI, while demonstrating strong problem-solving and project management skills.

EDUCATION

B.E in Computer Science & Engineering (AI&ML)

V.S.B Engineering College, Karur
Aug 2029

HSC

National Model Senior Secondary School, Coimbatore
May 2025

SSLC

Sri Ramakrishna Central School, Coimbatore
May 2023

SKILLS

- Machine learning
- Data analysis
- Python programming
- Algorithm design
- Natural Language Processing
- Database Management
- Database Interaction
- API Development
- Frontend Development
- Cloud Computing
- Software Containerization
- Continuous Integration
- Problem solving
- Project management
- AI-Assisted Development

LANGUAGES

German **Tamil**
Beginner Level Native

WORK EXPERIENCE

Internship Experience

1 June, 2026 - 30 June, 2026 | Coimbatore

CodeBind Technologies

Trained and tuned classification models, achieving 95% prediction accuracy with random forest decision trees.

Developed crop prediction AI in Python utilizing scikit-learn to recommend crops based on soil and climate data.

Cleaned and preprocessed over 25,000 agricultural data points using pandas and numpy, enhancing data quality for model training.

Built real-time inference pipeline to deliver immediate crop recommendations based on raw user inputs.

PROJECT EXPERIENCE

Topic Learning Guide

Developed an adaptive study roadmap platform that generates step-by-step learning paths for technical topics alongside curated study resources.

Structured modular learning modules and milestones to help learners transition systematically from core fundamentals to advanced concepts.

Recommended verified articles, documentation, and tutorials through resource-indexing logic tailored to each step of the syllabus.

School Timetable Management System

Engineered an automated scheduling system designed to optimize school timetables and eliminate scheduling conflicts for teaching staff.

Balanced teacher workloads using constraint-satisfaction algorithms, reducing consecutive lecture fatigue and administrative overlap.

Implemented dynamic scheduling modes to automatically switch student timetables based on seasonal academic periods and exam preparation phases.

Stored teacher availability, classroom allocations, and subject constraints in relational database tables for rapid roster generation.

ACHIEVEMENTS

Best First Timer Award

YuvaBharathi MUN (YBMUN)

Represented school as a Mexican Delegate in a Model United Nations conference and won the Best First Timer award during Higher Secondary.

Best Orator Award

TalkFactory Club

Awarded Best Orator by TalkFactory Club during SSLC, in 7th standard.
